# DATA CENTER MANAGEMENT SERVICES

Data centers (**DC**) have become a convenient option for business to host their IT infrastructure. But, as in enterprise data centers, these too involve a high running costs. While the latent requirement and business volumes are high, overhead costs of running these large

Why Kryptos - Kryptos specializes in creating a - **services lead strategy for data centers**, resulting in higher profitability and customer attachments, better service levels and overall satisfaction. As a technology-agnostic partner, we understand the benefits, value-differentiations and integration of multiple technologies. Kryptos enables DCs in delivering

## Benefits of multi-tenant / shared platforms

Multi-tenant or shared service-platforms form a critical service for data centers. They enable DCs to provide enterprise solutions by combining the value of dedicated and multi-tenant solutions.

Why should data centers adopt multi-tenant platforms as compared to dedicated ones? Here are some key drivers:

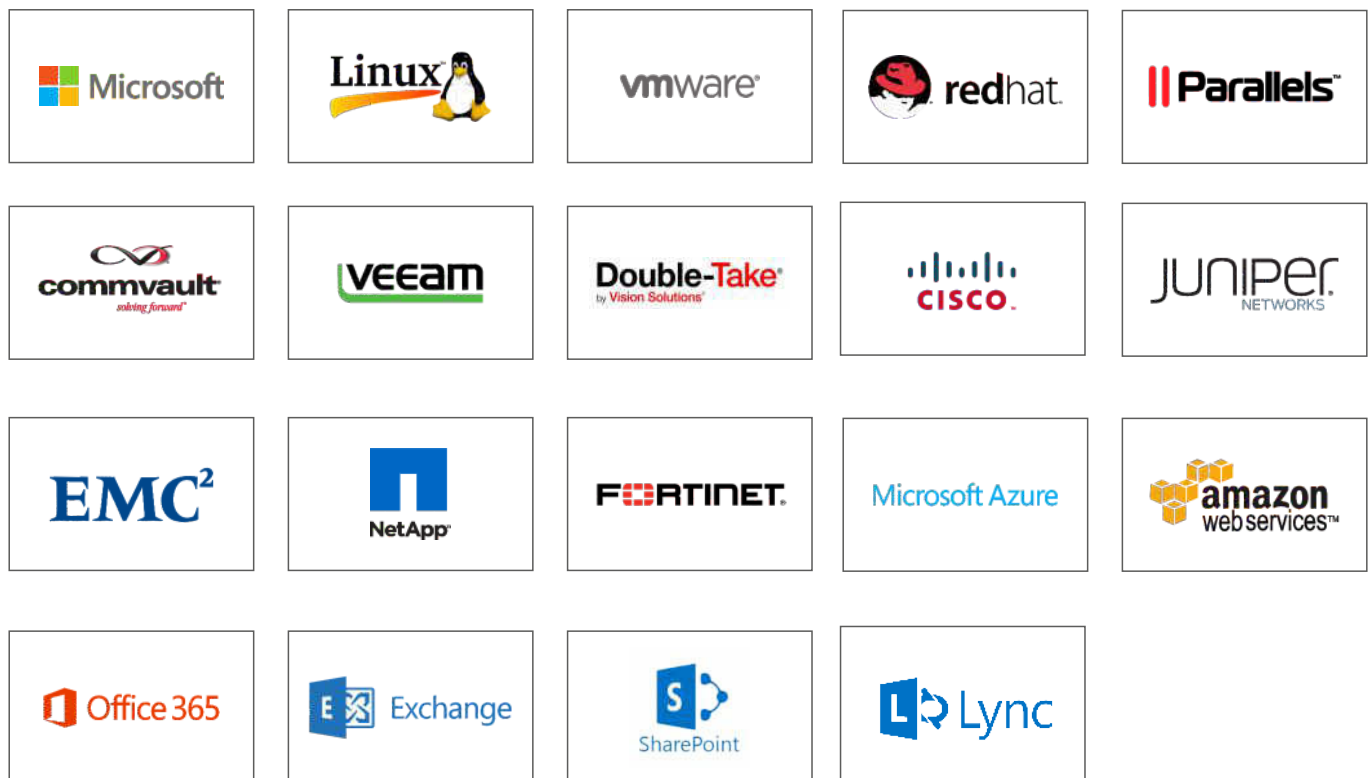

IAAS, PAAS & SAAS (Enterprise Solutions)	
Multi-tenant	Dedicated
Lower solution cost	High solution cost
High services attachment	Low service attachments
Subscription model	CAPEX
Quick provisioning	Higher provisioning time
Lower overheads	High overheads
Higher profit margin	Low-profit margin
Scalable infrastructure	Fixed infrastructure
Elastic in Expansion	Painful Expansion
SLA-driven offering	
Easy to scale up and down	

Multi-tenant services allow data centers to offer enterprises the flexibility to choose from best-of-breed offerings and the ability to utilize multiple platforms, applications and network resources. DCs thrive with tremendous cost-savings, an accelerated time-to-market, and a

## Data Center Management Major Offerings:

- Consulting practices
- Deployment of multi-tenant and enterprise solutions
- Migration to cloud services and integration with Public Cloud
- Private labelled or unlabelled, 24/7 management services

Our domain expertise covers the following technology areas

## Our offerings

- Infrastructure Management
- Deployment Services
- Migration Services

# Infrastructure Management

Kryptos' capabilities in data center managed services cover the entire gamut of IT requirements. Our managed services include:

- Server Management
- Database Management
- Application Management
- Platform Management
- Storage
- Network
- Security
- Back up services and DR

Our Network Operating Center (NOC) takes a proactive role ensuring 24/7 technical support and

## Deployment Services

Deployment services help you successfully add new IT and network solutions and applications. One of the key challenges when new systems, hardware and software are configured is to minimize the disruption of current services.

To make your IT investment productive, speed in deployment, smart planning, deep business understanding, technology nuances, data migration expertise, and high performance reliability are required. Our domain knowledge in IT and managed services gives us an edge in

### Value proposition for deployment services

- Planning and delivery in a time-bound manner
- Adherence to compliance and best practices, thereby increase reliability and reducing delays and rework
- Decrease in disruption to your production network during deployment

### Our services and skills

- Integration with public cloud
- Multi-tenant cloud managed services
- Back-up, replication and DR set-up
- Email and collaboration

# Migration Services

Kryptos' expert team offers migration services that are tailor-made to your specific requirements.

## Key benefits we offer under migration services

- Description of application / data to be migrated
- Description of migration process (tools, procedures)
- Risks and mitigation approaches during and post-migration
- Step-by-step project management and associated professional services
- Timeline based on downtime window and time-estimates of migration
- Description of customer responsibilities during migration
- Validation process

## Services and skills

- Windows Operating Systems.
- VMware 4.0 or 5.0 to 5.5
- Hosted exchange to O365
- Data base versions, SQL, MySQL, DB2
- Mailing platform and collaboration suite
