Technology skills

Consulting Services

Our consulting practice is driven by a solution-oriented approach. Core to our success is our understanding of clients' business needs; we recommend the best-fit technology(s) and design and build appropriate solutions that ensure easy adoption, quick provisioning, security and

Value Proposition

- Technology advisory services
- Industry best practises
- Strong compliance roadmap
- Better ROI
- Multi-technology SME
- IT assessment
- Lifecycle management

Deployment services

Kryptos provides solution architecture, design, and deployment services. Our consultants have a clear understanding of both enterprise and cloud architecture. We specialise in creating hybrid, customised and scalable IT solutions which are easy to adopt and manage.

Deployment services help you successfully add new IT and network solutions and applications. One of the key challenges when new systems, hardware and software are configured is to

Value Proposition

- Planning and delivery in a time-bound manner
- Adherence to compliance and best-practises, thereby increase reliability and reducing delays and rework
- Decrease in disruption to your production network during deployment

Our Services and Skills

- Integration with public cloud
- Multi-tenant cloud managed services
- Storage platform
- Back-up, replication and DR set-up

Migration Services

Technology migrations are a constant and integral element in the IT industry. The evolving landscape of connected applications, infrastructure and user-devices make IT migrations very challenging. Well-executed transitions are the key focus area for CIOs and CTOs; any poorly-executed transitions can trigger an IT nightmare, system crashes and unavailability of services,

Key Benefits

- Description of application / data to be migrated
- Description of migration process (tools, procedures)
- Risks and mitigation approaches during and post-migration
- Step-by-step project management and associated professional services
- Timeline based on downtime window and time-estimates of migration
- Description of customer responsibilities during migration
- Validation process

Services and Skills

- Windows Operating Systems.
- VMware 4.0 or 5.0 to 5.5
- Hosted exchange to O365.
- Data base versions, SQL, MySQL, DB2
- Mailing platform and collaboration suite
