

Migration OnPrem: MongoDB to Azure Mongo DB API for Cosmos DB

CHALLENGE

- Emirates Post, a postal government department in Dubai had document management system in their on-premise data center stored in MongoDB.
- Emirates post were not able to process data with speed and local data center was not providing required support to process

SOLUTION PROVIDED

- The local data center was not providing support to process the documents with application.
- Hence, Kryptos suggested Emirates post to move the mongo dB data into Azure Cosmos DB to process the millions of records in minutes
- We have provided Azure Cosmos DB configuration to Emirates post.

BENEFITS

- Post Azure Cosmos DB configuration Emirates Post able to process their shift data information in faster way.
