

Reducing engineering risks and fueling employee productivity with M365

M365 MIGRATION MODERNIZE THE WAY YOU WORK

CHALLENGE

An Oil & Gas sector client wanted help in **streamlining operations and providing employees with the information tools they required to work from anywhere** and improve engagement and collaboration.

SOLUTION PROVIDED

Office 365 platform supported by Power BI - seamlessly via Microsoft Teams, SharePoint, Azure, Delve, Stream, OneNote, Planner, and Power Platform was implemented.

Teams was proposed to improve the overall **integrity and dependability, for promoting collaboration**, using video chat, screen share, and reducing emails across departments and locations enabling easy and fast to access the right content at the right time, anywhere, any place.

Central repositories for document storage were created **to facilitate flexible working arrangements to provide a seamless work experience for staff**, even for those who were digitally challenged.

BENEFITS

- **60% faster rate at which critical information** could be accessed in the fields was made possible.
- **Reduced the operating costs significantly by saving time and effort** from navigating multiple network drives, hard drives, desktops, and various intranets for sharing information across the departments.
